TESTIMONIALS

★★★★★ "We had a great experience working with Kim to have motorized privacy screens installed on our pool cage. She was very responsive and got back to us to answer questions the same day, she was reliable and arrived when she said she would, the product came in on time and installation was done within a few days after the product was delivered by her manufacturer. Kim's knowledge of her products and her attention to excellent customer service leads to me highly recommend her company. Thanks to Kim, and the 3/8 & Co. team for helping us enjoy the Florida lifestyle!" —E.B.

★★★★★ "I own a company that builds large custom homes in Tampa and St. Petersburg. I have used 3/8 and Co. to install electric roll down screens on several homes. I am currently using them to install screens on to more large homes. I highly recommend this company. The owner is very nice, detail oriented and the quality of the product is the best I have found on the market. I had used another larger brand name company prior to finding 3/8 and Co. but will never go back. The level of service and cost of the product is much better with 3/8 and Co." —P.W.

★★★★★ "Excellent source and resource for multiple outdoor screen and shade projects. Recently installed motorized shades on our lanai and couldn't be more pleased with the quality of product and work. Call this company first before wasting your time chasing down quotes from mediocre companies." —R.M.

ABOUT OUR NAME

Hi, I'm Kim Boynton, owner of 3/8 & Co. In early 2013, two of my friends and I were sitting by my pool watching our children swim. I have three children: 2 sons and a daughter. My friends each have one son. All the children at the time were 12 years old or younger, and the three of us women—divorced, single moms—were talking about our lives, living paycheck to paycheck, and our desire for a better life for our kids. As we chatted, the boys were splashing and getting rambunctious as boys will do. One of my friends looked at me and said "Look at your daughter over there playing by herself. Why don't you just have one more child before we all turn 40, and maybe she'll get a sister to play with."

I looked at her like she was crazy, and started counting all the bodies at the pool, including the three of us. "One, two, three, four, five, six, seven, eight.... My 3/8 are enough to keep me busy for the rest of my life! Plus I'll be starting my business soon." She asked: "Your 3/8?" "Yes," I exclaimed, counting my three kids out of the 8 of us. "My 3/8 and Company are enough to keep me busy for the rest of my life!"

The name 3/8 and Co. stuck with me. So I saved up some money ($500, which took me about 6 months), filed my paperwork, created a website, and got business cards printed.

I started from nothing, living check to check, as a single Mom with 3 kids. Today I'm a woman in construction, living in a man's world and growing my business every single day. Drive, determination, and dedication is what keeps this company going and growing.

HURRICANE SCREENS

Hurricane screens are coverings that withstand winds of up to 276 miles per hour. Much stronger than typical window screens, they protect homes and businesses from flying debris. They are especially suitable for large spaces such as lanais, porches, and balconies.

Polypropylene hurricane screen has become extremely popular for both residential and commercial sites. Our Tampa motorized hurricane screen is versatile in use and slim in profile and offer robust hurricane protection. Our hurricane screen is available in several colors and can be utilized for openings up to 24 feet in width.

HURRICANE SHUTTERS

Hurricane shutters from 3/8 & Co. provide not only protection from hurricane winds but they also provide security, energy efficiency and thermal comfort. They are constructed with strong security interlocking aluminum profiles which are built to withstand impact. The guide rails prevent the slat curtains from being ripped out from the edges to stop potential tampering.

Key benefits of hurricane shutters are advanced security, energy savings, noise reduction, comfort and privacy... not to mention excellent protection from the effects of hurricane winds, rain, and blowing debris.

Why install hurricane screens or shutters?

It's important to note that there are different types of hurricane screens available, including fabric, metal, and polycarbonate options. Each type has its own strengths and installation considerations. Local building codes and regulations might dictate requirements for hurricane protection in areas prone to severe weather, so it's essential to work with a professional to be sure you're in compliance with these guidelines.

HURRICANE PROTECTION
Protect the property from the destructive force of hurricanes

WIND RESISTANCE
Reduce chances of wind-related damage and subsequent structural failure

WATER AND RAIN PROTECTION
Provide an extra layer of protection against water intrusion

PREVENTING PRESSURE BUILDUP
Maintain pressure equilibrium and preventing sudden pressure changes

ENERGY EFFICIENCY
Potentially reduce energy consumption for cooling or heating

INSURANCE REQUIREMENTS
Lower the risk of water and wind damage and subsequent claims

SECURITY
Screens and shutters serve as a deterrent against intruders and provide an extra layer of security for the property
